PROFESSIONAL SUMMARY

A results-driven Data Scientist with experience developing and deploying AI-enabled models. Proven ability to leverage Python, SQL, and machine learning frameworks like TensorFlow to develop, train and test models for NLP and image processing. Experience in a professional setting includes developing a Generative AI chatbot and a strong eagerness to master Azure cloud services, RAG pipelines to drive project success.

EDUCATION

B. Tech in Computer Science | Vasireddy Venkatadri Institute of Technology | GPA: 8.75/10 **Aug 2019 – May 2023**
Intermediate – M.P.C | D.V.C Viveka Junior College | GPA: 10/10 **Jun 2017 – Apr 2019**
10th Standard | M.V.R.S Viveka High School | GPA: 10/10 **Apr 2016 – Mar 2017**

WORK EXPERIENCE

Programmer Analyst | Cognizant Technology Solutions – Hyderabad **Apr 2023 – Sep 2024**

- Contributed to the development of a **Generative AI chatbot** using **Python** and Open AI APIs, focusing on model integration into a production workflow for enhanced information extraction.
- Performed extensive data preparation and modelling, importing raw data into Power BI and creating visualizations that met precise client requirements for business intelligence.
- Assisted senior engineers in testing and validating model outputs, ensuring reliability and accuracy.

Internship on Data Science & Analysis | Cuvette – Remote **Oct 2024 – Mar 2025**

- Learnt Data Science techniques and Machine Learning algorithms through developing various projects using several datasets.

Engineer | ValueLabs - Hyderabad **Apr 2025 – Present**

- Conducting data validation and manipulation for a CRM tool using Postman, ensuring data integrity for downstream systems. This role strengthens my understanding of data handling in a corporate environment.
- Working on automating the repetitive tasks that will reduce the human efforts by 10%.

PROJECTS

HANDWRITTEN DIGIT RECOGNITION **May 2021 – Jun 2021**

- Developed, trained, and tested a neural network from scratch using **TensorFlow** to classify handwritten digits with high accuracy. Managed the entire model lifecycle from data preparation on a large dataset to final evaluation.

NLP-Powered News Classification **May 2021 – Jun 2021**

- Built a machine learning model to classify news articles by truthfulness, directly applying **NLP** and information extraction techniques. Utilized Scikit-learn to train the model on a large corpus of text data, demonstrating skills in handling unstructured data.

Object Detection in Real-Time Videos **Nov 2022 – Apr 2023**

- Engineered a high-performance object detection system using **Python**, **OpenCV**, and a pre-trained YOLO model to identify and label objects in live video streams.

RAG-based Q&A System **Aug 2025 – Sept 2025**

- Developed a RAG pipeline that analyzed patterns in a custom knowledge base, demonstrating skills in **information extraction** by extracting the answers to the queries from the custom knowledge base.

TECHNICAL SKILLS

- Programming Languages:** Java, Python, SQL.
- AI/ML Framework & Libraries:** TensorFlow, Scikit-learn, Pandas, NumPy, OpenCV.
- AI/ML Specializations:** Generative AI, Natural Language Processing (NLP), Image & Document Processing,

Retrieval-Augmented Generation (RAG), Transformer Models Architecture.

- **Data Analysis Skills:** Data Analysis (Intermediate), Power BI, Tableau.
 - **Other Skills:** OSI PI Historian, Postman, Git, API Integration
-

CERTIFICATIONS

- Power Platform Fundamentals - Microsoft Certified
- AI for Everyone - DeepLearning.AI
- Python for Data Science and AI - IBM
- Salesforce Developer Virtual Internship Certificate - AICTE
- Google Cloud Practitioner by Google
- AWS Machine Learning Foundations - Amazon AWS
